In an effort to offer more demographic and geographic information, we have modified our traditional counts report format. This format will not contain any combinations of data unless specifically requested. You may request combinations by providing the row description to your political data representative by fax or email.

For example, by requesting the row description showing "Voted 11-00", you would receive a report with each row that only include voters who meet the requested criteria.

Please contact your PDI Representative or visit [www.politicaldata.com](http://www.politicaldata.com) if you have any questions

In an effort to offer more demographic and geographic information, we have modified our traditional counts report format. This format will not contain any combinations of data unless specifically requested. You may request combinations by providing the row description to your political data representative by fax or email.

For example, by requesting the row description showing "Voted 11-00", you would receive a report with each row that only include voters who meet the requested criteria.

Please contact your PDI Representative or visit [www.politicaldata.com](http://www.politicaldata.com) if you have any questions

In an effort to offer more demographic and geographic information, we have modified our traditional counts report format. This format will not contain any combinations of data unless specifically requested. You may request combinations by providing the row description to your political data representative by fax or email.

For example, by requesting the row description showing "Voted 11-00", you would receive a report with each row that only include voters who meet the requested criteria.

Please contact your PDI Representative or visit [www.politicaldata.com](http://www.politicaldata.com) if you have any questions

In an effort to offer more demographic and geographic information, we have modified our traditional counts report format. This format will not contain any combinations of data unless specifically requested. You may request combinations by providing the row description to your political data representative by fax or email.

For example, by requesting the row description showing "Voted 11-00", you would receive a report with each row that only include voters who meet the requested criteria.

Please contact your PDI Representative or visit [www.politicaldata.com](http://www.politicaldata.com) if you have any questions

In an effort to offer more demographic and geographic information, we have modified our traditional counts report format. This format will not contain any combinations of data unless specifically requested. You may request combinations by providing the row description to your political data representative by fax or email.

For example, by requesting the row description showing "Voted 11-00", you would receive a report with each row that only include voters who meet the requested criteria.

Please contact your PDI Representative or visit [www.politicaldata.com](http://www.politicaldata.com) if you have any questions

In an effort to offer more demographic and geographic information, we have modified our traditional counts report format. This format will not contain any combinations of data unless specifically requested. You may request combinations by providing the row description to your political data representative by fax or email.

For example, by requesting the row description showing "Voted 11-00", you would receive a report with each row that only include voters who meet the requested criteria.

Please contact your PDI Representative or visit [www.politicaldata.com](http://www.politicaldata.com) if you have any questions

In an effort to offer more demographic and geographic information, we have modified our traditional counts report format. This format will not contain any combinations of data unless specifically requested. You may request combinations by providing the row description to your political data representative by fax or email.

For example, by requesting the row description showing "Voted 11-00", you would receive a report with each row that only include voters who meet the requested criteria.

Please contact your PDI Representative or visit [www.politicaldata.com](http://www.politicaldata.com) if you have any questions

In an effort to offer more demographic and geographic information, we have modified our traditional counts report format. This format will not contain any combinations of data unless specifically requested. You may request combinations by providing the row description to your political data representative by fax or email.

For example, by requesting the row description showing "Voted 11-00", you would receive a report with each row that only include voters who meet the requested criteria.

Please contact your PDI Representative or visit [www.politicaldata.com](http://www.politicaldata.com) if you have any questions

In an effort to offer more demographic and geographic information, we have modified our traditional counts report format. This format will not contain any combinations of data unless specifically requested. You may request combinations by providing the row description to your political data representative by fax or email.

For example, by requesting the row description showing "Voted 11-00", you would receive a report with each row that only include voters who meet the requested criteria.

Please contact your PDI Representative or visit [www.politicaldata.com](http://www.politicaldata.com) if you have any questions

In an effort to offer more demographic and geographic information, we have modified our traditional counts report format. This format will not contain any combinations of data unless specifically requested. You may request combinations by providing the row description to your political data representative by fax or email.

For example, by requesting the row description showing "Voted 11-00", you would receive a report with each row that only include voters who meet the requested criteria.

Please contact your PDI Representative or visit [www.politicaldata.com](http://www.politicaldata.com) if you have any questions

In an effort to offer more demographic and geographic information, we have modified our traditional counts report format. This format will not contain any combinations of data unless specifically requested. You may request combinations by providing the row description to your political data representative by fax or email.

For example, by requesting the row description showing "Voted 11-00", you would receive a report with each row that only include voters who meet the requested criteria.

Please contact your PDI Representative or visit [www.politicaldata.com](http://www.politicaldata.com) if you have any questions

In an effort to offer more demographic and geographic information, we have modified our traditional counts report format. This format will not contain any combinations of data unless specifically requested. You may request combinations by providing the row description to your political data representative by fax or email.

For example, by requesting the row description showing "Voted 11-00", you would receive a report with each row that only include voters who meet the requested criteria.

Please contact your PDI Representative or visit [www.politicaldata.com](http://www.politicaldata.com) if you have any questions

In an effort to offer more demographic and geographic information, we have modified our traditional counts report format. This format will not contain any combinations of data unless specifically requested. You may request combinations by providing the row description to your political data representative by fax or email.

For example, by requesting the row description showing "Voted 11-00", you would receive a report with each row that only include voters who meet the requested criteria.

Please contact your PDI Representative or visit [www.politicaldata.com](http://www.politicaldata.com) if you have any questions

In an effort to offer more demographic and geographic information, we have modified our traditional counts report format. This format will not contain any combinations of data unless specifically requested. You may request combinations by providing the row description to your political data representative by fax or email.

For example, by requesting the row description showing "Voted 11-00", you would receive a report with each row that only include voters who meet the requested criteria.

Please contact your PDI Representative or visit [www.politicaldata.com](http://www.politicaldata.com) if you have any questions

In an effort to offer more demographic and geographic information, we have modified our traditional counts report format. This format will not contain any combinations of data unless specifically requested. You may request combinations by providing the row description to your political data representative by fax or email.

For example, by requesting the row description showing "Voted 11-00", you would receive a report with each row that only include voters who meet the requested criteria.

Please contact your PDI Representative or visit [www.politicaldata.com](http://www.politicaldata.com) if you have any questions

In an effort to offer more demographic and geographic information, we have modified our traditional counts report format. This format will not contain any combinations of data unless specifically requested. You may request combinations by providing the row description to your political data representative by fax or email.

For example, by requesting the row description showing "Voted 11-00", you would receive a report with each row that only include voters who meet the requested criteria.

Please contact your PDI Representative or visit [www.politicaldata.com](http://www.politicaldata.com) if you have any questions

In an effort to offer more demographic and geographic information, we have modified our traditional counts report format. This format will not contain any combinations of data unless specifically requested. You may request combinations by providing the row description to your political data representative by fax or email.

For example, by requesting the row description showing "Voted 11-00", you would receive a report with each row that only include voters who meet the requested criteria.

Please contact your PDI Representative or visit [www.politicaldata.com](http://www.politicaldata.com) if you have any questions

In an effort to offer more demographic and geographic information, we have modified our traditional counts report format. This format will not contain any combinations of data unless specifically requested. You may request combinations by providing the row description to your political data representative by fax or email.

For example, by requesting the row description showing "Voted 11-00", you would receive a report with each row that only include voters who meet the requested criteria.

Please contact your PDI Representative or visit [www.politicaldata.com](http://www.politicaldata.com) if you have any questions
